GX GAMING MOUSE
Scorpion M8-610

Your Winning Gear

The GX Gaming Scorpion M8-610 is an elegant laser gaming mouse with a powerful laser sensor engine, which allows gamers to have maximum sensitivity to game without any surface limitation and is ideal for either hand. Featuring 5-level DPI instant switching and up to 6 programmable button settings, you can hit upwards of 8200 DPI for maximum precision and efficiency. In addition, with the Genius Device Management Application, you can configure your Scorpion M8-610 settings per game or for your personal preferences and update driver/firmware versions as well.

Laser	Ergonomic Design	8200 DPI	24 Macro Keys	20 Million Clicks	LED Illumination

Unbelievable precision
Built-in powerful laser sensor engine, you can game on most surfaces, such as dusted glass or smooth and matte desktop. M8-610 provides the maximum sensitivity to improve your game efficiency no matter what surface you are using.

Superb comfort
The M8-610 design is perfect for either hand. It fits any palm size for natural posture. A superb rubber coating grip gives you total control, and is comfortable to operate during long gaming sessions.

In game DPI switching instantly
You can define the five DPI levels (800-2400-4800-6400-8200) using the DPI button control without interrupting game play. Shift between your current DPI level to another level with a single button press.

Customize 6 programmable button settings
You can assign six programmable buttons to set a single or a multi-command with 24 macro key memory to greatly improve your gaming.

Configuration in one platform
One platform fulfills all your needs. You can configure your Scorpion M8-610 settings and driver/firmware updates using the Genius Device Management, including button customization, DPI performance adjustment, lighting display and macros per games or your personal preferences. You can install the Genius Device Management at global.geniusnet. com/download.
