

USB-C Cables and Adapters

The Extron USB-C cables and adapters provide connectivity and adaptation between USB-C devices (laptops, tablets and phones for example) to either DisplayPort, HDMI, or USB-C devices. They transport digital video as well as a control signal on a single cable.

The USB-C cable end must be connected to a host device (such as a laptop, tablet, or PC). Connect the DisplayPort or HDMI end to the display device. Exceptions are the USB-C to USB-A, USB-C to USB mini-B, and USB-C to USB-C cables, which are bidirectional.
