

# Epson AcuLaser C2900N Series

DATASHEET

Developed for demanding micro-businesses and small businesses, the Epson AcuLaser C2900N Series can make organisations more efficient while delivering professional results.

All models in this single-function series can easily handle large print jobs and, with print speeds of 23 pages per minute for both mono and colour, it is one of the fastest in its class. Professional-standard print resolution of 600x600dpi produces high-quality images, combined with vibrant and realistic colours thanks to Epson's AcuBrite toners.

Designed to meet the needs of complex IT environments, all models in the series come network-ready with numerous interfaces and emulations, including Gigabit Ethernet as standard, IPv6, Adobe® PostScript® 3™ and PCL 5c/6 emulations, to provide greater flexibility and easy integration.

Increase paper capacity to 500 sheets with an optional 250-sheet paper tray for increased productivity. And for greater efficiency, the C2900N model comes with optional double-sided printing, cutting paper usage and costs by up to 50 percent. This duplex feature comes as standard on the C2900DN.

The 256MB standard memory is among the highest in its class and you can enhance performance even further with an optional 512MB of additional memory.

As one of the most competitively-priced in its class, the C2900N Series offers great value for money. ENERGY STAR-qualified reduced power consumption helps businesses further reduce total cost of ownership and environmental impact.
