Overview

HP StorageWorks Data Protector Express ProLiant Edition is easy to install, easy to use and easy to manage backup and recovery software for HP ProLiant servers. It is an extension of the ProLiant solution available at zero incremental cost to HP ProLiant users. It provides protection for a single HP Proliant system running Windows or Linux by backing up data to disk and/or CD/DVD.
Note that this QuickSpec covers Data Protector Express ProLiant Edition. Separate QuickSpecs exist for Data Protector Express and Data Protector Express Single Server Edition.

- For HP Data Protector Express: http://www.hp.com/go/dataprotectorexpress
- For HP Data Protector Express Single Server Edition: http://www.hp.com/go/dataprotectorexpress/sse

Data Protector Express ProLiant Edition provides a subset of the functionality of Data Protector Express. Users of Data Protector Express ProLiant Edition can upgrade to Data Protector Express to use all the functionality of Data Protector Express, via a special upgrade SKU. Once the upgrade has been purchased and installed, the Data Protector Express options and functional extensions can be added to improve performance, protect online applications and execute network backups.

HP StorageWorks Data Protector Express 3.1 SP4 Upgrade SKU

Upgrade Data Protector Express ProLiant Edition to Data Protector Express media & LTU	BB117AP

NOTE: Requires existing ownership of Data Protector Express ProLiant Edition. The License Key delivered with this SKU checks for existence of the ProLiant Edition License Key, without this it will not work. The product received is exactly the same product as is received when BB117AA is ordered. This SKU allows owners of Data Protector Express ProLiant Edition to acquire Data Protector Express at a reduced cost.

- Special SKU (BB117AP) to acquire Data Protector Express at a discount when upgrading
- Easy and zero cost transition to Data Protector Express Single Server Edition if a HP tape product is added to ProLiant

Features/Functionality

Supported platforms

Data Protector Express is supported and has been tested with Windows, NetWare, and Linux operating systems. For a current list of supported operating systems visit http://www.hp.com/go/dataprotectorexpress.

Supported operating systems on Data Protector Express ProLiant Edition	Data Protector Express ProLiant Edition component	Supported operating systems
NOTE: Data Protector Express has additional supported operating systems	Backup Server	• Windows 2003 • Windows 2000 • Windows Small Business Server 2003 • Windows Small Business Server 2000 • Red Hat Enterprise Linux 4 • Red Hat Enterprise Linux 3 • SuSE Linux Enterprise Server 10 • SuSE Linux Enterprise Server 9 • SuSE Linux Enterprise Server 8

Hardware Prerequisites	Most operating systems list both minimum and recommended system requirements. As a general rule, if your system meets the minimum requirements for the operating system, it will also meet the minimum system requirements for Data Protector Express. However, for better performance, we recommend that your system meets or exceeds the operating system's recommended requirements. For example, Windows XP Professional requires a 233 MHz Pentium or Celeron family or AMD-K6, AMD Athlon or AMD Duron family processor, 64MB of RAM and 1.5GB of available hard disk space. But Microsoft recommends a 300 MHz processor and 128MB of RAM. Depending on your specific requirements, as well as exceeding the operating system's recommended requirements, your system should also have the following: • 20MB of hard disk space for Data Protector Express Catalog (minimum) • CD drive for Data Protector Express installation (recommended) • CD/DVD writer or bootable HP tape device for use with the Data Protector Express Bare Metal Disaster Recovery option
Distribution Media	Installation package for Windows and Linux downloaded from: • ProLiant System Management Home Page (SmartStart 7.5 and newer) • http://www.hp.com/go/dataprotectorexpress/pe

Software Licensing	Data Protector Express ProLiant Edition is instantly-on for 60 days post installation and requires a license key to be used beyond 60 days. If the software is acquired from the ProLiant System Management Homepage, it is recommended that the instruction on the Protect Your Data page are followed to acquire the License Key before installation. The License Key is then entered during the installation process. If the software is acquired from hp.com, then the License Key must be acquired after installation. In this case, see the "EntitlementCertificateDPExpsProliantEdt.pdf" in the doc directory of installation directory. License Keys are delivered via HP's WebKey service at https://webkey.external.hp.com.

Service and Support, HP Care Pack, and Warranty Information

Support included with the Product	Data Protector Express ProLiant Edition is available with phone-in get-started support for the first 90 days from purchase of the HP ProLiant server. There is no included HP support with Data Protector Express ProLiant Edition when installed on ProLiant servers more than 90 days old.
