

# Balance Keyboard

## Possibly the most ideal keyboard for you

Balance Keyboard helps you keep a good posture, with your arms in front of your body when working with a centred mouse. Despite its compact design, the keyboard has all the functionalities of a full-size keyboard. It comes with shortcuts, media keys, and a numeric keypad. Furthermore, the keyboard is ergonomically designed with adjustable tilt, so you can choose the inclination that fits you best.

### **The perfect ergonomic partner for RollerMouse and SliderMouse**

Balance Keyboard minimises the edge under the space bar and reduces your fingers' stretching. Reducing the distance to the keyboard has a massive ergonomic impact, which is why the Balance Keyboard, with its narrow edge, is the perfect partner for your RollerMouse or SliderMouse.

The adjustable legs and tilt functions make it easy to set the keyboard in three different positions: negative, neutral, and positive tilt. When you place the keyboard in a negative tilt, your hands automatically angle to the optimal position for typing. Ultimately, it leaves your fingers much more relaxed while typing.
