

MPN: HDMI-DUMMY

# 4K Universal Virtual Display adapter HDMI Dummy Plug

After plugging it in, it will be virtualized as a display, which will solve the problem if not connecting the display with a black screen or the lowest resolution state during remote control. This part can also solve the situation if the monitor cannot be turned on without connecting the monitor, and the graphics card does not work. This part does not need a driver.

- Max. Resolution: 3840 x 2160@60Hz
- It needs the support of HDMI2.0. That is, RX460 and GTX1050 graphics cards.
- The special resolution can be customized.
- Small size, latest chip, low power consumption, no heat.
- Support plug and play, hot plug.
- No driver required, support all systems.
