About Your Hardware

1	LED Indicator <ul style="list-style-type: none">• Red: Booting• Red (blinking): Ready to connect• Blue (blinking): Wi-Fi connecting• Blue: Wi-Fi connected
2	Infrared LEDs
3	Microphone
4	microSD slot <ul style="list-style-type: none">• Insert a microSD card to store video recordings
5	Speaker
6	Reset button
7	USB port

Setting Up Your Device

Step 1: Positioning of Live! Cam IP SmartHD

Place it upright, mount it on the wall or stick on metal surfaces with its magnetic base.

Connecting to power supply

Connect your camera directly to an AC power supply using the supplied cable and power adapter.

LED indicator:

- Red: Booting
- Red (blinking): Ready to connect

Mounting the camera

Secure the mounting plate to a flat surface using either the screws or mounting tape supplied.

Notes:

Peel off the protective film on the bottom of the camera before mounting.

Ensure the camera is mounted within reach of an AC power supply.

Step 2: Installing the Live! Cam app

1. Connect your smart device to your Wi-Fi network.
2. Install the free Creative **Live! Cam** app from the App Store or Google Play.

Notes:

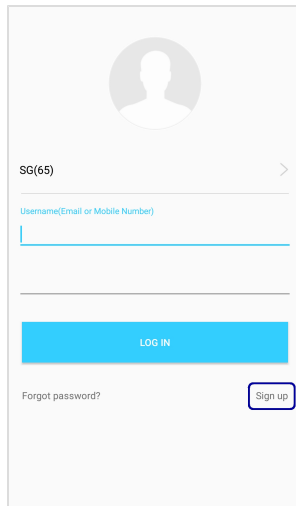

Ensure you connect to a 2.4GHz Wi-Fi network.

Keep your Wi-Fi name and password ready.

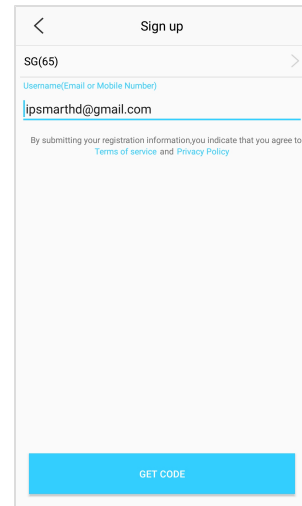

Step 3: Creating an account

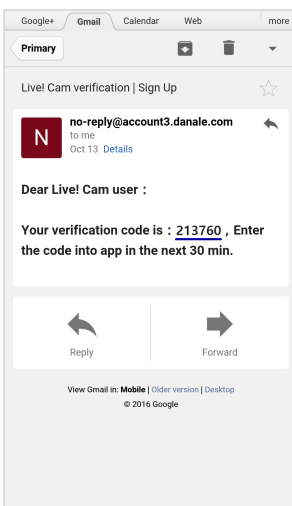

Open the Live! Cam app.

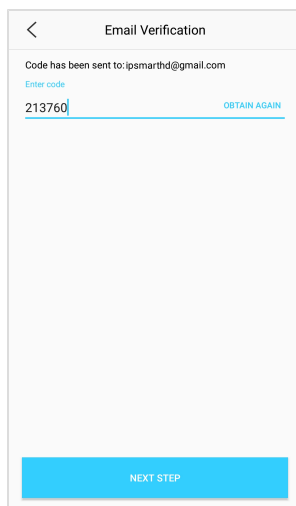

Select **Sign Up** to create a new account.

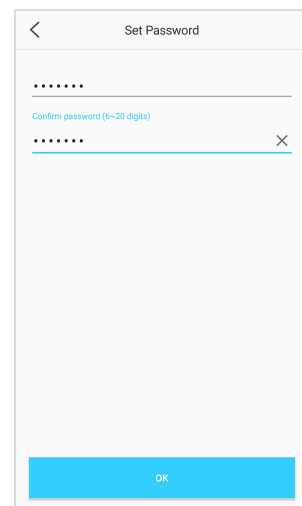

Enter your valid **Email** address
OR Phone Number.

A **Verification Code** will be sent to your email or phone.

Enter the **Verification Code**.

Enter your preferred **Password**.

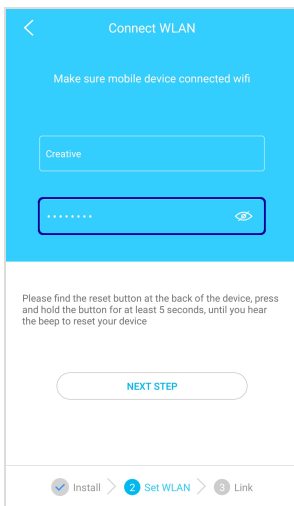

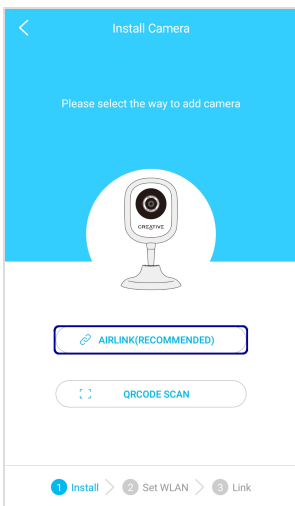

Step 4: Adding Camera

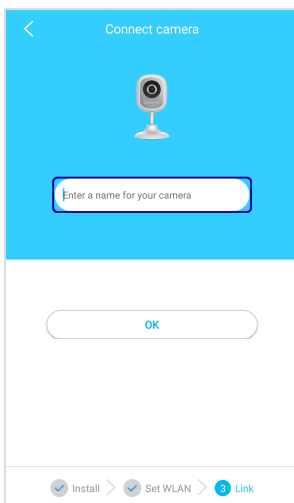

Note:

*If the LED indicator is not blinking red, reset the camera. Use a pin and press the reset button at the back of your camera for 10 seconds or until you hear a sound. See **Using Your Device – Restore Factory Default Settings.***

Via Airlink (Recommended)

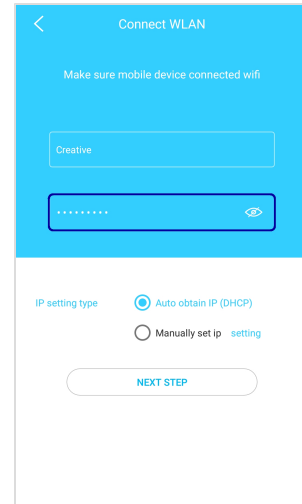

Enter your Wi-Fi password.

Enter a name for your camera.

When your camera is connected, the LED indicator will light up in blue. ^

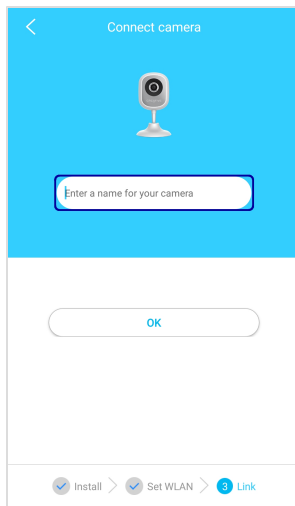

Via QR Code Scan

Enter your Wi-Fi password.

When your camera is connected, the LED indicator will light up in blue. ^

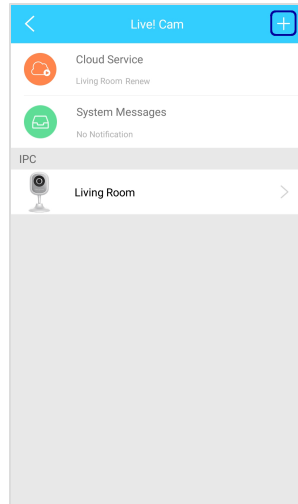

Enter a name for your camera.

Note:

- ^ If your camera fails to connect:
- Check your Wi-Fi connection.
 - Ensure that the Wi-Fi password is correct.
 - Reset the camera and try again.

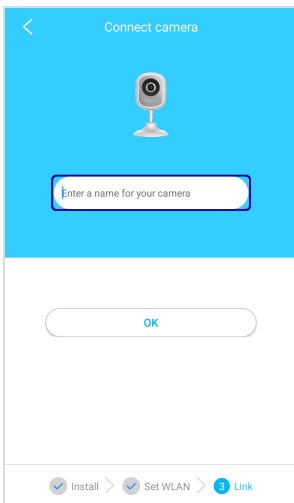

To change the name of your camera, see **Using Your Device – Rename Camera**

To add another camera

Select **Add** to add your camera.

When your camera is connected, the LED indicator will light up in blue. ^

Enter a name for your camera.

Note:

- ^ If your camera fails to connect:
 - i. Check your Wi-Fi connection.
 - ii. Ensure that the Wi-Fi password is correct.
 - iii. Reset the camera and try again.

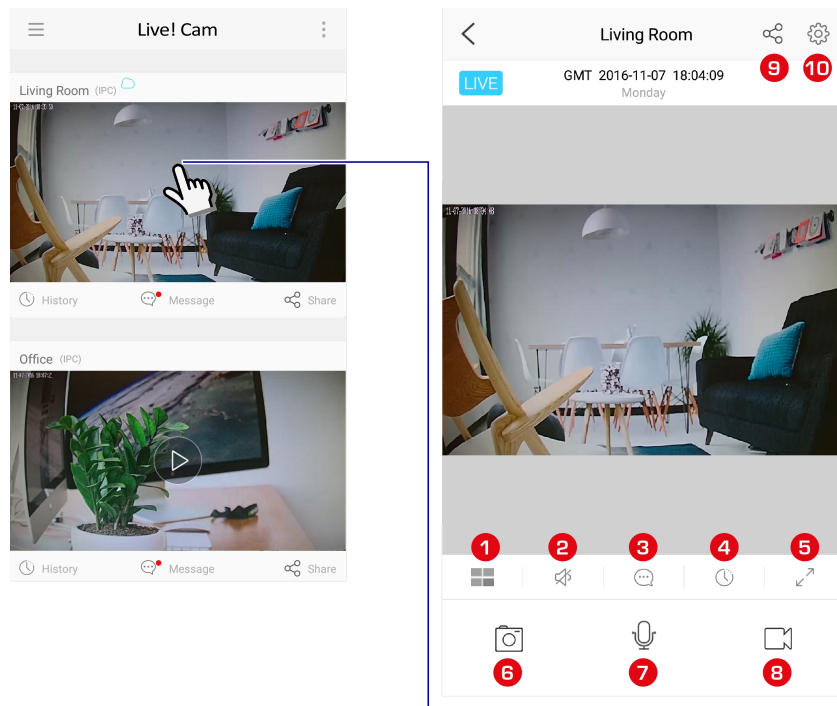

Using Your Device

View Live Video

After adding your camera(s), the camera(s) will be displayed on the main screen.

If there is more than one camera, tap ▶ to view the live video of the selected camera.

For more playback options, tap on the playback screen.

1. Multiview

View 4 cameras live on one screen.

 fullscreen mode

 single view

☰ list of cameras

Tip:

Double-tap the playback screen to switch from single view to multiview, and vice versa.

2. On/Off Camera Microphone 🚫

Turn on the camera microphone to listen to audio via the camera.

3. Alerts 💬

View short video recordings of motion or sound detected.

4. Recording history 🕒

View the video recording history stored on the cloud or microSD card.

System Messages

When someone shares their camera with you, you will see the invitation in System Messages.

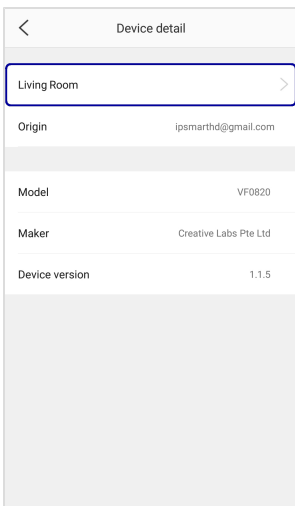

Accept the invitation to view the camera.

Rename Camera

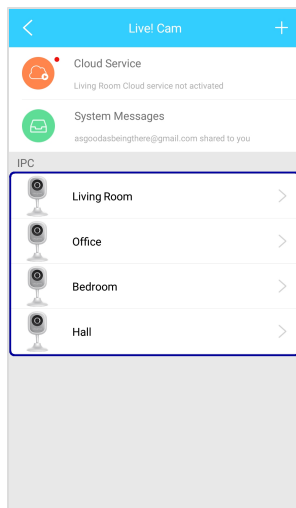

Select a camera to configure.

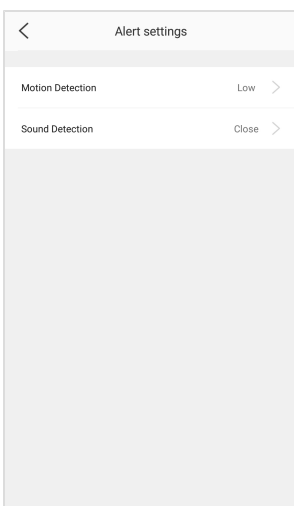

Rename your camera.

Set Alert Notifications

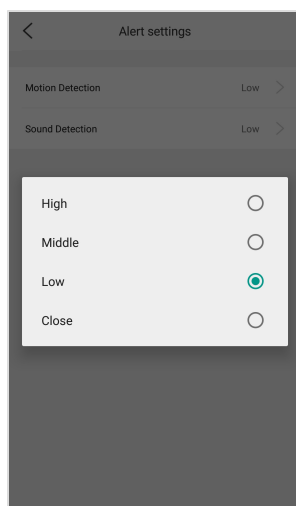

When alerts are enabled, the camera will push notifications to your smart device when motion or sound is detected.

Select a camera to configure.

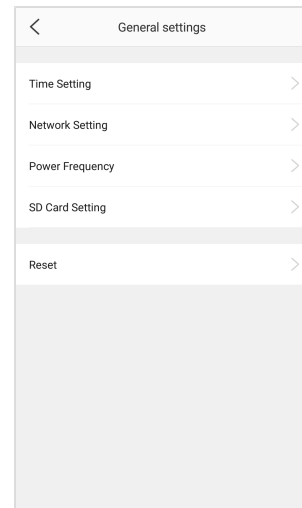

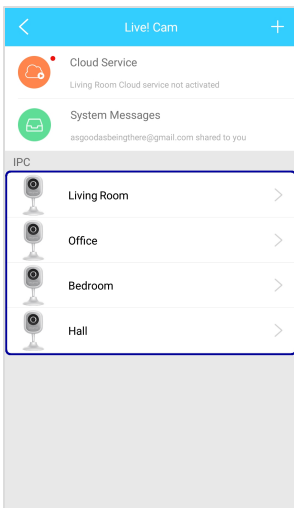

Select **Motion Detection** or **Sound Detection**.

Select the sensitivity level.

Set Time and Connection

Time Setting

Set the time on your camera. You can also sync it to your smart device's time.

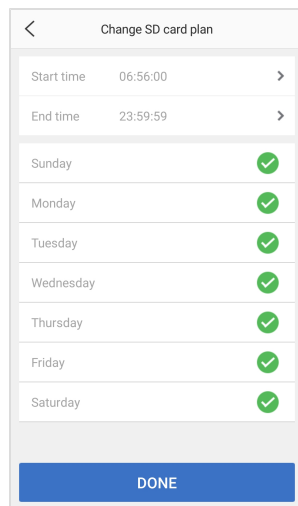

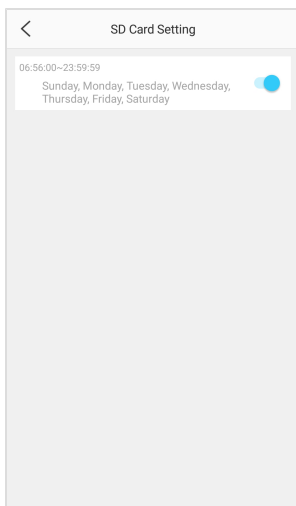

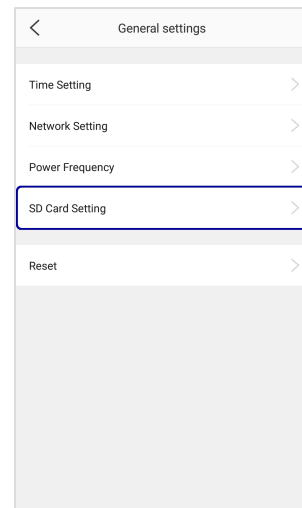

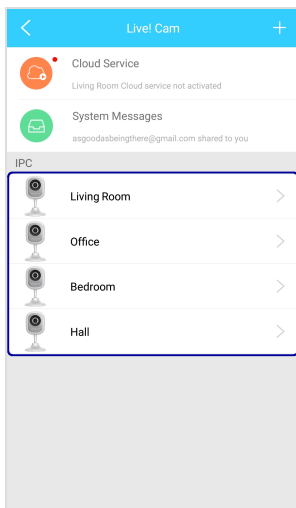

Network Setting

Change the Wi-Fi network connection. Configure your camera's LAN settings.

Set microSD Recording Schedule

If a microSD card is inserted into the camera, you can set the camera to automatically record videos according to a schedule.

Set the time and day desired.

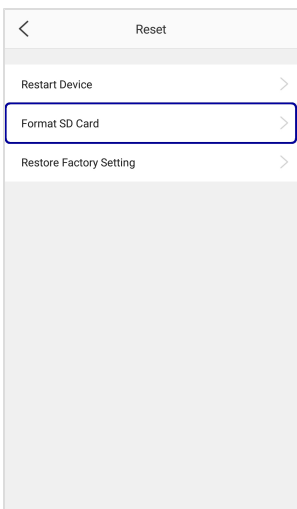

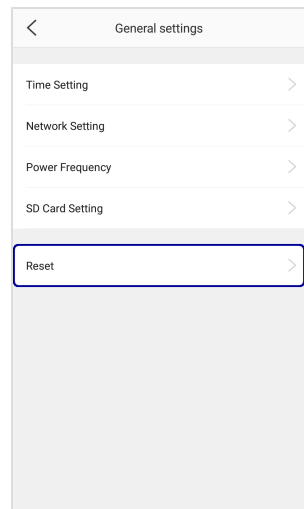

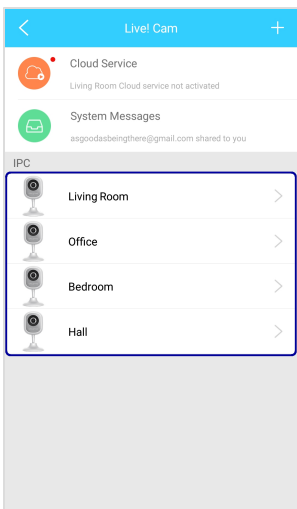

Note:

Recording on a microSD card is continuous. However, when the storage space is full, the oldest footage will automatically be overwritten by new recordings.

Format microSD Card

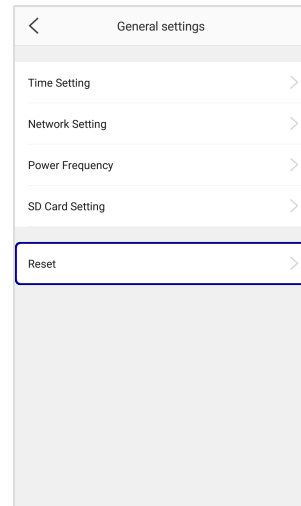

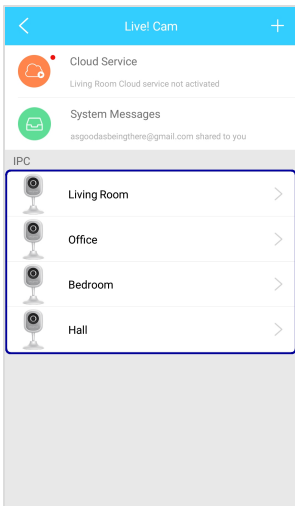

You should format the microSD card before using it for the first time on your camera.

WARNING:
Backup all your data before formatting. Formatting will erase all the data on the microSD card.

Restart Camera

If the live video freezes or if your camera is not working properly, restart the camera.

Restore Factory Default Settings

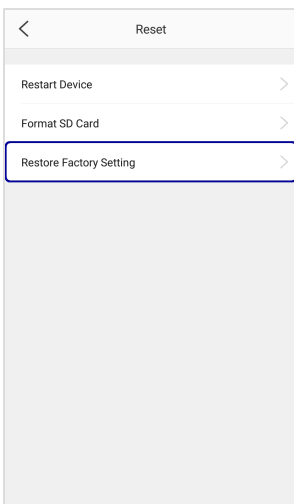

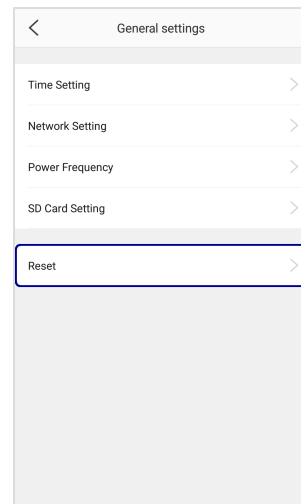

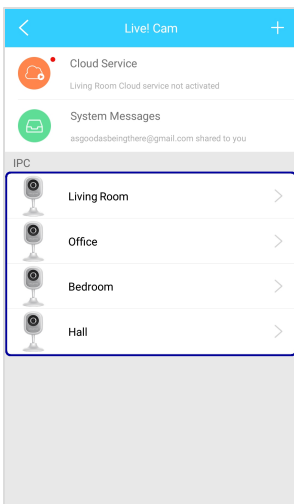

WARNING:

All settings and configurations made previously on your device will be erased.

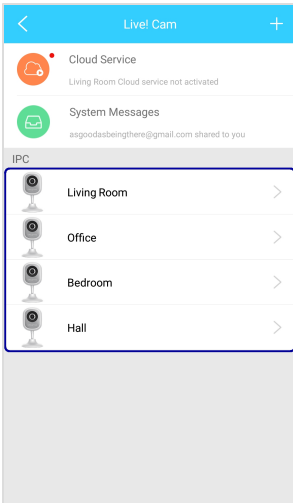

Insert a pin and hold for 10 seconds or until you hear a sound.

OR

Upgrade Firmware

To check for the latest firmware.

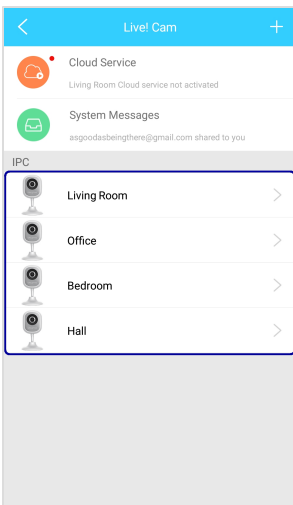

Select a camera.

Delete Camera

To remove a camera from your account.

Select a camera.

Note:

To properly remove a camera from your account, reset the camera before adding it to another account.

Using Cloud Storage

Your Live! Cam account comes with an optional cloud storage.

You can record 24/7 non-stop and backup videos automatically to the cloud so you won't miss a thing.

View your video history from anywhere, on any device, and share them with anyone in a secure and easy way.

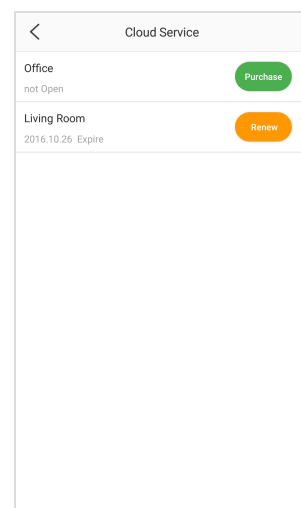

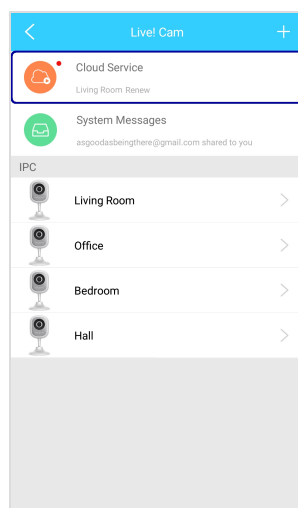

Notes:

Each Live! Cam account is entitled to a free 30-day trial. The trial is activated automatically upon adding the first camera to the account.

Video backup to the cloud is continuous until your subscription expires.

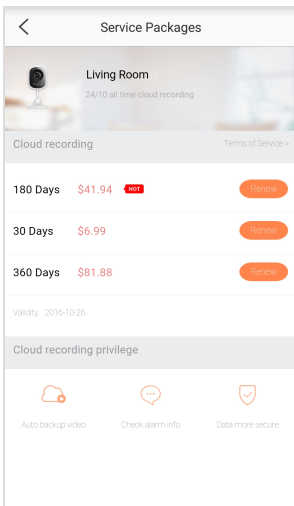

At any time, the cloud will only store 10 days worth of recording. On the 11th day, the oldest footage (Day 1) will be overwritten automatically.

View Cloud Subscription Status

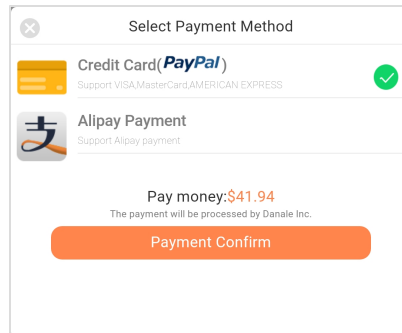

See the expiry date.
Purchase or renew your cloud subscription.

Purchase Cloud Storage

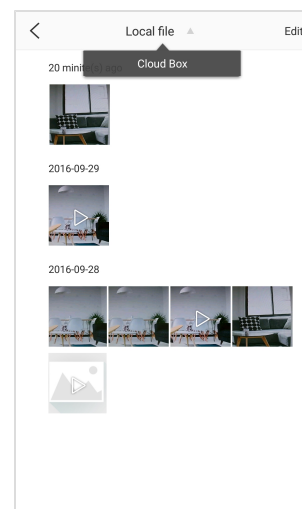

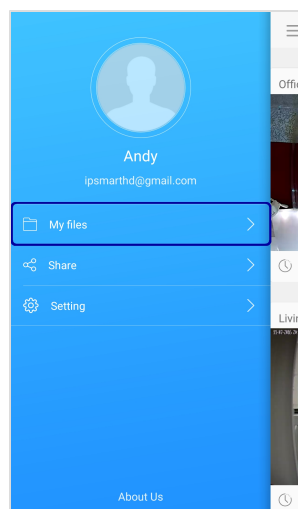

Select your desired package.

Confirm payment method.

View Files on Cloud

Select **Cloud Box**.

Note:

Video backup files are encrypted and cannot be viewed through the cloud storage.

*To view the backup video, tap  on the main screen. See **Using Your Device – 4. Recording history***

Live! Cam Computer Software

To take full advantage of your Live! Cam IP SmartHD, you can also install the Live! Cam software on your computer.

The Live! Cam software lets you:

- Set up your Live! Cam IP SmartHD
- Stream live videos 24/7, in clear 720p HD
- Listen and talk with 2-way audio
- Record videos and review footage so you don't miss a thing
- View 4 cameras at once and control them remotely.
- Automatically backup videos to the cloud.
- Receive future updates and features.

Installing Application

For Windows OS

1. Using a standard web browser, visit support.creative.com/ipsmarhd.
2. Locate **Live! Cam IP SmartHD** and the software package for your Windows operating system.
3. Download this package into your local hard disk.
4. Locate and launch the software package.
5. Follow the on-screen instructions to complete the installation.
6. When prompted, restart your computer.
7. Launch the application by locating and clicking **Live! Cam**.

For Mac OS

1. Using a standard web browser, visit support.creative.com/ipsmarhd.
2. Locate **Live! Cam IP SmartHD** and the software package for your Mac OS.
3. Download this package into your local hard disk.
4. Double-click the downloaded file to uncompress it.
5. Double-click the **Live! Cam** icon and follow the subsequent on-screen instructions to complete the installation.
6. Launch **Live! Cam** from the **Applications > Creative** folder.

Uninstalling Application

In the event that an uninstallation is required (such as for upgrades), please follow the following procedure.

Before you begin, close all running applications. Applications that are still running during uninstallation may not be removed.

For Windows OS

1. From the **Control Panel**, click **Uninstall a program**.
2. Select **Live! Cam**.
3. Click the **Uninstall** button or option.
If the **User Account Control** dialog box appears, click the **Continue** button.
4. Click the **Yes** button.
5. When prompted, restart your computer.

For Mac OS

1. Click **Applications > Creative > Creative Uninstaller**.
2. Select **Live! Cam**.
3. Click the **Uninstall** button.
4. Follow the on-screen instructions.
